

Cloud Computing Assignment 1

(Due date: Thursday 9/14/2017)

1. Read a white paper (posted) titled **“Above the Clouds: A Berkeley View of Cloud Computing”**.
2. Make a page summary.

Submit on Bb as well as a paper version by the class beginning time.

[Assignment #1 Logistics]

1. Maximum 8/10 points will be given to the students who submitted a summary in time.
2. The instructor will prepare 25 multiple-choice (or True/False) quiz questions from the paper.
3. The questions will be asked to the students in class (a random class time).
4. The first 5 questions will be asked to the volunteering students (if any) and other 20 questions will be given to the randomly chosen students.
5. If the question is answered right in time (after reading the question, one will have 1 minute to answer), the student will receive additional 2 points. However, if the answer is not right, the student will lose 2 points (volunteering students will not have any deduction).
6. If the chosen student is not in class (absent student), 5 points will be deducted.
7. During the question session, students can bring and read the paper. However, any assist from their classmates will be considered as a cheating (2 points off).

[No Cheating]

- Preparing a summary, do not just cut and paste. Use your own word.
- Answering a question, do not seek an answer from your classmates.
